

Scenario:

You and your friends decide to go out to eat at a pizza restaurant. The group gets a large pepperoni pizza and drinks. The bill comes out to \$24.53 after tax and a tip. You would like an easier way of splitting the check.

Task 1:

Choose a game to play with your friends.

Task 2:

Split the bill by randomizing the amount paid by each friend.

Task 3:

Change the number of people you have with you in the app.

Notes:

What things could be changed (three min):

1. Give more options for games
2. Make the subtitles pop out more
3. The settings needs to have better details

What things could be kept the same (three min):

1. The font for the title is perfect
2. The way the app tells how much to pay is good
3. The randomizer is a great idea
